VIG Graphics – The Flute Laminator Company | Flute Laminator

VIG Graphics, India's original **Flute Laminator Company**, delivers high-speed, precise, and reliable lamination solutions for the corrugated packaging industry. Since 1995, it has empowered manufacturers with advanced automation to boost productivity, accuracy, and workflow efficiency.

In the fast-evolving world of corrugated packaging, manufacturers are constantly pushed to increase speed, improve accuracy, and optimize workflow efficiency. As businesses strive to meet rising demand and tighter delivery timelines, automation has become the backbone of modern packaging operations. Standing at the forefront of this transformation is **VIG Graphics—India's original Flute Laminator Company**, delivering cutting-edge lamination solutions since 1995.

A Legacy of Precision Engineering

For nearly three decades, VIG Graphics has built a reputation for engineering some of the industry's most reliable **3-ply and 5-ply flute laminator machines**. With a strong foundation in mechanical innovation and customer-centric design, the company has grown from a pioneering manufacturer to a technology leader trusted by converters across India and overseas.

Each machine is crafted with a clear purpose:

- ✔ **Enhance production speed**

✔ **Deliver stable and precise lamination**
✔ **Reduce manual intervention and operational downtime**

This blend of performance and dependability makes VIG Graphics a preferred automation partner for businesses aiming to upgrade their packaging lines.

Engineered for Today's High-Demand Packaging Environment

The corrugated packaging industry is expanding rapidly, driven by e-commerce, retail, and a growing emphasis on sustainable materials. To stay competitive, manufacturers need equipment that can keep pace with both high-volume and specialty packaging requirements.

VIG Graphics' flute laminators are designed to seamlessly integrate into modern production floors, offering:

- **High-speed lamination for 3-ply and 5-ply sheets**
- **Consistent registration accuracy for superior print-to-flute alignment**
- **Durable build quality ideal for long-term, continuous operation**
- **Operator-friendly controls that simplify training and daily use**

Whether you're producing mass-market corrugated boards or premium laminated packaging, these machines ensure a perfect balance of speed, precision, and reliability.

Low Maintenance, High Performance—The VIG Advantage

One of the strongest differentiators of VIG Graphics is its focus on **low-maintenance engineering**. Every component is designed to extend machine life and minimize downtime, resulting in:

- Reduced service interruptions
- Lower operating costs
- Improved production efficiency

The company's dedication to innovation ensures that each new-generation machine is smarter, sturdier, and more intuitive than before.

Committed Support and Long-Term Partnership

Beyond manufacturing world-class machinery, VIG Graphics stands out for its exceptional customer support. From installation and training to ongoing service, the company ensures that clients receive the guidance they need to keep operations running smoothly.

This long-term, relationship-driven approach has helped VIG Graphics earn the trust of packaging manufacturers who rely on consistent performance day after day.

Driving the Future of Corrugated Packaging Automation

As the corrugated industry continues to expand, the demand for fast, reliable laminating solutions will only grow. With decades of expertise and a clear vision for technological advancement, VIG Graphics is committed to empowering packaging businesses with next-generation automation tools.

For companies seeking dependable, high-speed, and expertly engineered flute laminators, VIG Graphics remains a proven and future-ready partner.
